

**GUJARAT TECHNOLOGICAL UNIVERSITY****BE- SEMESTER-VII (NEW) EXAMINATION – WINTER 2024****Subject Code:3172912****Date:11-12-2024****Subject Name: Principles of Textile Processes****Time:10:30 AM TO 01:00 PM****Total Marks:70****Instructions:**

1. Attempt all questions.
2. Make suitable assumptions wherever necessary.
3. Figures to the right indicate full marks.
4. Simple and non-programmable scientific calculators are allowed.

**MARKS**

- |            |   |           |
|------------|---|-----------|
| <b>Q.1</b> | (a) Explain interrelationship between shedding and beating.   | <b>03</b> |
|            | (b) Derive an equation for sley velocity and acceleration.  | <b>04</b> |
|            | (c) Explain the retardation of shuttle with hinged swell, along with necessary diagrams.                        | <b>07</b> |
| <b>Q.2</b> | (a) What is perfect drafting? Why it is not achieved in conventional draw frame.                                | <b>03</b> |
|            | (b) Explain only procedure to find out transfer efficiency.   | <b>04</b> |
|            | (c) What is cylinder loading? Derive an equation to calculate cylinder loading.                                 | <b>07</b> |
|            | <b>OR</b>   |           |
|            | (c) Derive an equation for traveler speed.  | <b>07</b> |
| <b>Q.3</b> | (a) Explain the term kinematics for sley.   | <b>03</b> |
|            | (b) Discuss the various factors affecting the unwinding tension.  | <b>04</b> |
|            | (c) Discuss briefly effect of l/r ratio on type of movement to sley.  | <b>07</b> |
|            | <b>OR</b>   |           |
| <b>Q.3</b> | (a) Explain the significance of fiber acceleration behind top comb.   | <b>03</b> |
|            | (b) Discuss the factors affecting drafting force.   | <b>04</b> |
|            | (c) Explain foster theory of perfect drafting.  | <b>07</b> |
| <b>Q.4</b> | (a) Is the acceleration of shuttle uniform? Why?  | <b>03</b> |
|            | (b) Explain briefly power required for picking.   | <b>04</b> |
|            | (c) Derive the formula for friction forces in negative let off motion also discuss design of let off mechanism. | <b>07</b> |
|            | <b>OR</b>   |           |
| <b>Q.4</b> | (a) What is cleaning efficiency of blow room?   | <b>03</b> |
|            | (b) What are the reasons of end breaks at ring frame? Discuss any two.  | <b>04</b> |
|            | (c) Derive an equation of yarn tension at any radius 'r'  | <b>07</b> |
| <b>Q.5</b> | (a) Explain, chase length and coil density in reference to optimizing yarn content on ring bobbin.              | <b>03</b> |
|            | (b) State the types of stretch in sizing and factors affecting it.  | <b>04</b> |
|            | (c) Discuss the velocity and acceleration of projectile with suitable curves.                                   | <b>07</b> |
|            | <b>OR</b>   |           |
| <b>Q.5</b> | (a) Explain the importance of size pick up.   | <b>03</b> |
|            | (b) Derive equation of winding tension ( $T_w$ ) in a spinning balloon zone.                                    | <b>04</b> |
|            | (c) Discuss briefly various aspects of weft insertion in airjet loom.   | <b>07</b> |
